The following pages contain descriptions of indirect funded site services currently in place at the INL. These descriptions are intended to provide information on the scope of these services as they presently exist, and are not intended to influence the contractor's approach to the ICP work scope. This table contains full time equivalents (FTE) associated with the work scope, which may be different from actual headcount. The FTEs and dollars allocated to each activity in the table reflect the levels in FY 2003. FTEs and costs may be different at contract award. Section C.1.10 contains requirements that the ICP contractor, in coordination with the INL contractor, must address related to these services. The INL contractor is responsible for 42% of costs and employees per Section H.21 (a)(2).

| employees per Section H.21 (a)(2). | | | | |

| Description | WBS Number | FTEs | Total FY 2003 Cost \$(000) | Description of Activity |
| Description | WBS Number | 11123 | Cost φ(σσσ) | Operate INTEC cafeteria. Provide labor for food services (meals, snacks, |
| INTEC Cafeteria | C.5.04.01.05.01.03 | 4 | \$457.6 | and fresh baked products) for employees, subcontractors, DOE-ID, etc. located at INTEC. Purchase and maintain quality, fresh food products for meal preparation and baking. Maintain a food inventory for use in emergency situations at the site. Perform proper dishwashing and sanitation on all dishware, tables, counters, equipment, etc. |
| WROC/PBF Common Use Facilities/Services | C.5.04.01.19.01.01/2 | 4 | \$272.7 | Provides facility maintenance, cleaning, and technical support for non- process buildings located at the WROC area and detailed work planning for preventative, predictive, and corrective maintenance work orders for 18 active facilities at WROC. |
| Education Outreach | C.5.03.01.09 | 1 | \$1,690.6 | To enhance core technical capabilities of the INL and its partner universities (U of I and ISU). Implementation of collaborative educational initiatives that contribute to the mission of DOE and the INL including professional staff exchanges, appointment of faculty to provide leadership of INL missions, and develop educational initiatives to increase advanced science and engineering degrees at the INL. |
| | | | | Includes functions associated with determining title elections for intellectual property, supporting the patent application process, acquiring DOE approvals for proposed partnerships, and administering active partnerships (licenses, CRADAs, technical assistance, and Work for Others). |
| Tech Transfer and Commercialization | C.5.03.01.36 | 25 | \$4,090.4 | Support INL's executive leadership in defining overall mission and vision for the laboratory. Assist management in situation assessments and in setting the strategic direction, goals, and priorities of the INL. Complete external validation of INL core competencies. Manage the INL institutional planning process and ensure compliance with Office of Science and other customer requirements. Ensure key planning activities are aligned with and support successful integration of R&D with operations. |
| Strategic Planning and Integration | C.5.03.01.37 | 45 | \$8,609.9 | |

|-------------------------|--------------|------|-------------------------------|--|
| Description | | FIES | | Provides cost effective facility space planning and integration analysis function at the INL. Ensure that facilities are utilized in a manner with the mission of the INL. Plan and schedule the movement of personnel site-wide. Prepare and maintain facility floor plans to include layout, square footage, and occupancy. Prepare semi-annual reports that identify space vacancy rates, space utilization rates, square footage occupied per individual, and efficiency rates. Monitor and approve all furniture purchases. Support space planning activities. |
| Space / Area Planning | C.5.04.01.28 | 2 | | Provides for three main areas of support to Construction Operations: construction cross-cutting activities, construction warehouse operations, and construction training initiatives/information management. Construction cross-cutting activities include management oversight, chemical management program, resource management, safety program management, and equipment and facility management. Construction warehouse operations include activities for requisitions, receiving, inspecting, and distributing material/equipment in support of INL construction. Construction training initiatives/information management enables selected construction subcontractor training to be obtained at computer laboratories located outside the INL in Idaho Falls and Pocatello. Construction subcontractor training records are gathered and entered in a centralized repository. These efforts provide one location for verification of construction subcontractor training records. |
| Construction Management | C.5.05.01.03 | 20 | \$2,308.1 | Provide resource planning and management oversight for Field Service |
| Computer Field Services | C.5.05.01.04 | 13 | \$1,013.7 | technicians including time and materials needed for required training and equipment as well as technical direction in diagnosing and resolving equipment problems for computers and peripherals at the desktop and enterprise levels. |

| Description | WBS Number | FTEs | Cost \$(000) | Description of Activity |
| | | | | Produce photos and videos for scientific and technical information (STI) products produced at the INL as per Contractor Requirements of DOE Order 1430.1D. Provide photographic and videography services to DOE-ID and INL Contractors. These services include film developing and printing, image processing, aerial photography, and video production. Photography also oversees the production of audiovisual programs such as slide shows, filmstrips, and multimedia presentations. Provide supervision and scheduling and tracking/billing for work produced in Photography and Videography. Provide printed/copied reports for all INL contractors. These services include offset printing, photo copying, process camera work, offset press plate developing, binding, labeling and distributions, and engineering drawing copying. Offset printing services are available at WCB. High speed copying is available at WCB, EROB, TSB, IRC, CFA, INTEC, and TRA. Administer multiple vendor contracts in accordance with the U.S. Joint |
| | | | | Committee on Printing and the Government Printing Office regulations. |
| Printing and Photographic Services | C.5.05.01.05 | 23 | \$2,775.1 | Procure and lease materials, equipment, supplies and services. Provide a centralized and consolidated procurement and supplier quality functional organization and single point of contract for all matters associated with procurement and supplier quality related to nuclear and/or radiological safety. Assist in the determination of requirements, initiate and control procurement, and ensure conformance with customer requirements and objectives. Administer the Purchase Card Program and provide system administration for Passport. Receive, inspect, and distribute procured material/equipment. Account, store, and issue inventory items and spare parts. Direct company program for small and small disadvantaged business. |
| Supply Chain Management | C.5.05.01.07 | 51 | \$4,656.8 | |
| | | | | Produce scientific and technical information products at the INL per Contractor Requirements of DOE Order 241.1. Provide document processing, visual arts, and writing/editing services to DOE-ID and INL contractors. Also responsible for developing standard templates for company controlled documents and implementing publication standards site-wide. |
| Publications and Graphic Services | C.5.05.01.08 | 66 | \$5,741.4 | |
